

PANDA — MVP Acceptance Criteria

This document defines when each MVP feature is considered DONE. A feature is not complete unless all acceptance rules are satisfied.

1) RFQ

- User can create RFQ with product, quantity, notes
- RFQ saved to database
- List of RFQs visible
- Validation errors shown clearly
- No data loss on refresh
- Audit log records who created

2) Orders

- Convert RFQ to Order
- Order status changes via milestones
- Timeline shows history
- User cannot skip statuses
- Order linked to RFQ
- Archive only — no deletion

3) Document Center

- Upload documents to an Order
- Replace document keeps version
- Document tagged by order
- Preview possible where supported
- Archive instead of delete
- Activity log for every change

4) Live Verification

- Create verification request with reason
- Supplier uploads photos/video clips/text
- Buyer can approve, request changes, or stop
- Evidence stored permanently
- Linked to order
- Locked after closure

5) Notifications

- Email notifications only
- Triggered on key events
- User can toggle alerts
- Clear subject and copy
- Notification log stored
