PANDA — Developer Screening Pack

This pack helps us select the right developer for PANDA (trust■first trading MVP). We are not building payments or escrow in MVP. Focus is RFQ → Orders → Documents → Live Verification → Timeline.

1) Core Screening Questions

1 Explain the MVP in your own words.

2 Which tech stack would you use and why?

3 How would you design the database (high■level)?

4 How do we avoid losing data?

5 How will you show progress during development?

2) Test Task (Mandatory)

Build a simple RFQ form that saves to database and lists RFQs. Fields: product, quantity, notes. Use Postgres, push to GitHub, include README. Deadline: 48–72 hours.

3) Evaluation Checklist (Score 1–5)

- Understands MVP — no payments/escrow
- Explains database clearly
- Uses GitHub correctly
- Communicates clearly
- Delivers working test task
- Does not push unnecessary features
- Respects milestones and process

4) Developer Invitation Message

Hi — we are building PANDA, a trust■first trading MVP. No payments. Focus on RFQ, Orders, Documents, Live Verification. We work in sprints with milestone payments. Step 1: answer screening questions. Step 2: test task. Reply "READY" if interested.

Notes

Reject developers who avoid documentation, refuse GitHub, demand full payment upfront, or push unnecessary features. Prefer developers who talk about structure, security, and process.
